SITE UPGRADE BREAKDOWN

Royal Kings Auto Care — The Next Level

A section-by-section look at what's changing on your site. Every upgrade is built around one goal: turning more visitors into booked details.

05 Booking Form — refinements

06 Ready for the Royal Treatment NEW

07 Mobile — sticky "Book Now" NEW

08 Under the hood — SEO, Speed, Accessibility

09 What we need from you

01 — FIRST IMPRESSION

The hero does more heavy lifting

The hero is the first thing every visitor sees. The current version leans on the logo alone. The upgraded version makes the brand name the headline, adds a clear sub-slogan, and stacks three trust badges that answer the customer's silent questions in under two seconds: "Do they come to me? Do they cover Winnipeg? Will I be happy with the result?"

CURRENT SITE

UPGRADED SITE

Brand-first headline

"Royal Kings Auto Care" becomes the hero — not a small logo tucked in the corner. First thing they remember is your name.

Slogan + reassurance line

"Convenience meets quality." Plus "Free estimates · No obligation · Same-day response" — kills every hesitation a new visitor might have.

Three trust badges

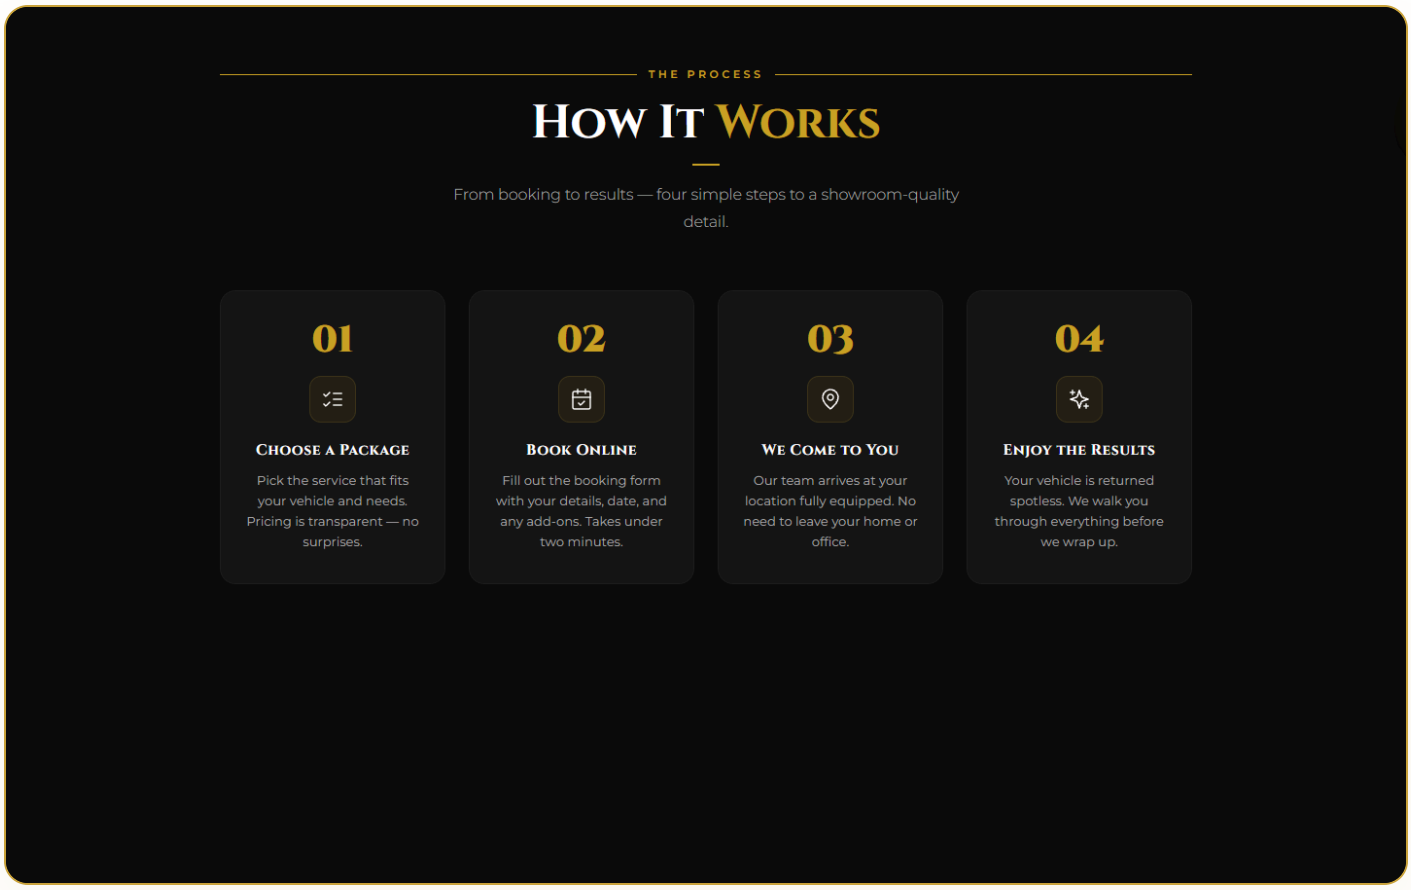
Mobile Service · Serving All Winnipeg · Satisfaction Guaranteed. Answers "do they come to me?" before they even have to ask.

02 — NEW PROCESS

A 4-step walkthrough — no more "what happens next?"

The single biggest objection on any mobile-service site: "I don't know how this works." The new "How It Works" section walks the customer from picking a package through to final delivery, so there are no surprises when you pull up to their driveway.

NEW SECTION ON THE UPGRADED SITE



Reduces phone calls

Every answered question is a call you don't have to take. Customers self-serve and book with confidence.

Sets professional tone

A clear, numbered process signals you run a real operation — not a side hustle. Higher perceived value = easier to charge premium pricing.

Filters out bad fits

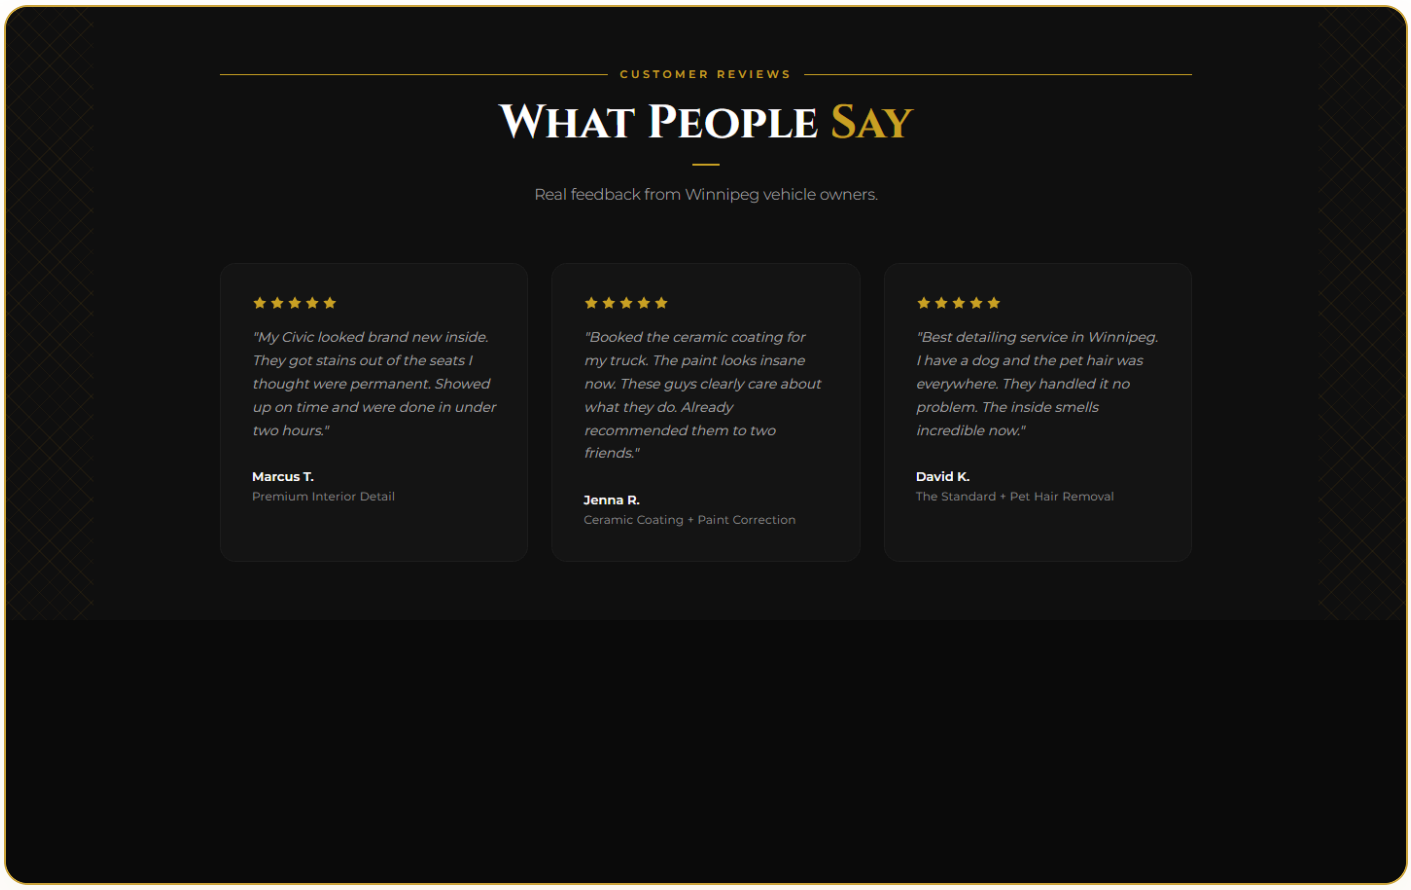
People who don't like your process self-select out before they waste your time with a quote request.

03 — NEW SOCIAL PROOF

Customer reviews section — the #1 trust builder

The single biggest driver of bookings for service businesses: "what do other people say about them?" The new reviews section is styled and ready — it just needs real quotes from real customers (placeholder content shown below).

PREVIEW — WAITING ON REAL CUSTOMER REVIEWS FROM YOU



5-star visual anchor

Gold stars grab the eye immediately. Signals quality before they even read a word.

Service tag on each review

Each review shows what was booked — so a reader sees the exact service they're considering was praised by someone else.

Hidden until ready

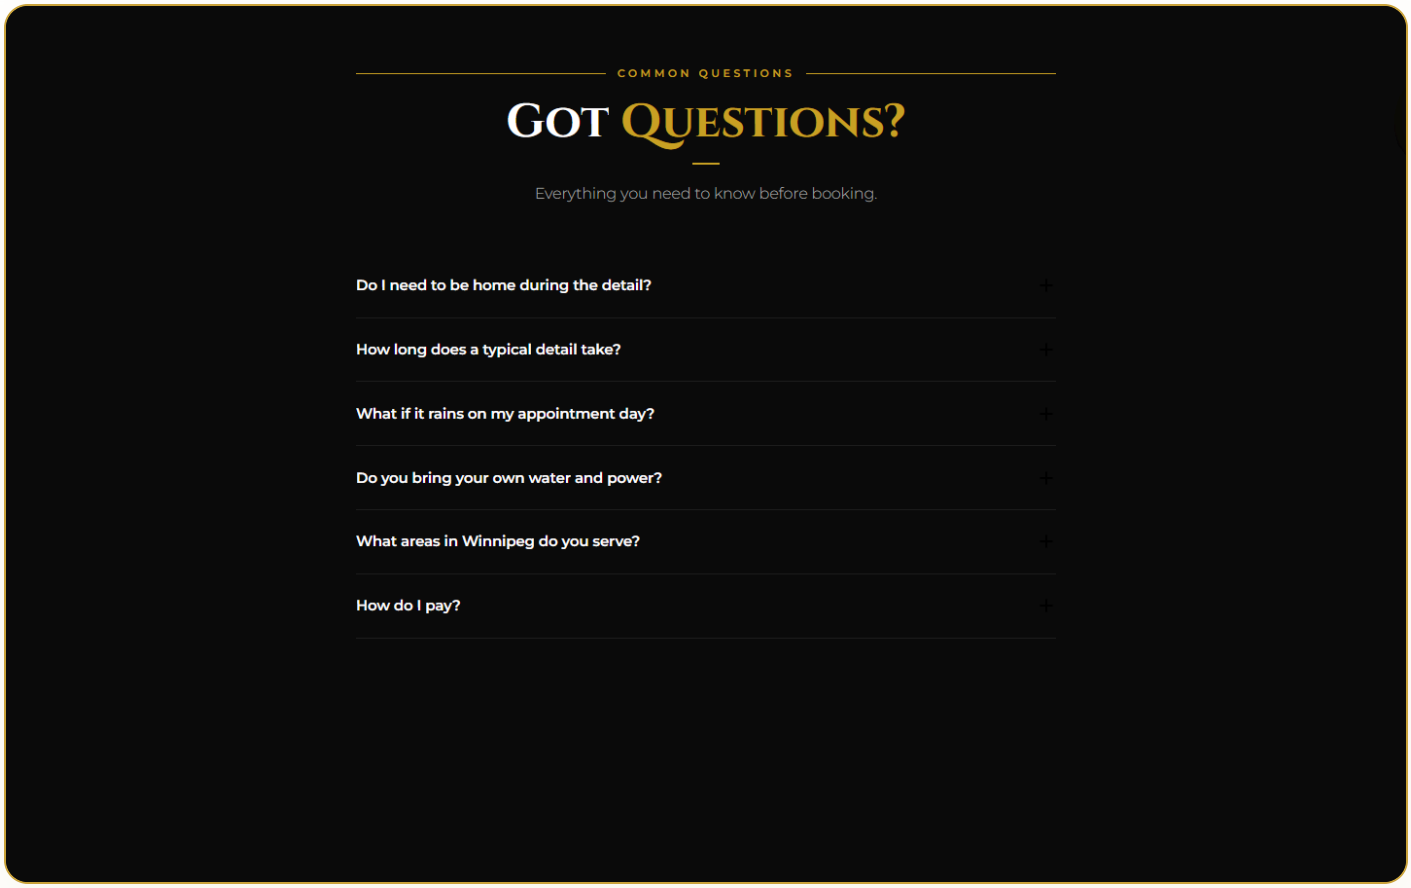
The section stays hidden on the live site until you send over real reviews — no fake placeholders shown to customers.

04 — NEW OBJECTION HANDLING

FAQ section — answers every hesitation

Six of the most common questions customers ask before booking — answered upfront in a clean accordion. Every question resolved here is a text or call you don't have to send.

NEW SECTION ON THE UPGRADED SITE



Closes the gap to booking

Customers don't have to wait for a reply before they can book. They find the answer, feel confident, then fill the form.

Google reads it too

FAQ content is indexed by Google and can show directly in search results — meaning free traffic from people searching specific questions.

Easy to edit later

If you notice the same question coming up over text, we just add it to the FAQ. The section scales with your business.

05 — BOOKING FORM

Same form, sharper CTA

The booking form was already solid. The upgrade tightens the CTA copy and adds some guardrails that catch issues before they become problems (24-hour minimum, 90-day max, spam protection).

● CURRENT — "REQUEST APPOINTMENT"

ADDITIONAL NOTES

e.g. Pet hair, heavy stains, specific concerns, address for mobile service, etc.

REQUEST APPOINTMENT

◆ We'll confirm your booking within 24 hours ◆

UPGRADED — "BOOK MY DETAIL"

First-person CTA converts higher

"Book My Detail" reads like the customer's own decision. Tested to convert better than passive copy like "Request Appointment."

Date guardrails

Minimum 24 hours in advance. Maximum 90 days out. Stops bookings you can't fulfill and keeps the calendar clean.

Silent spam protection

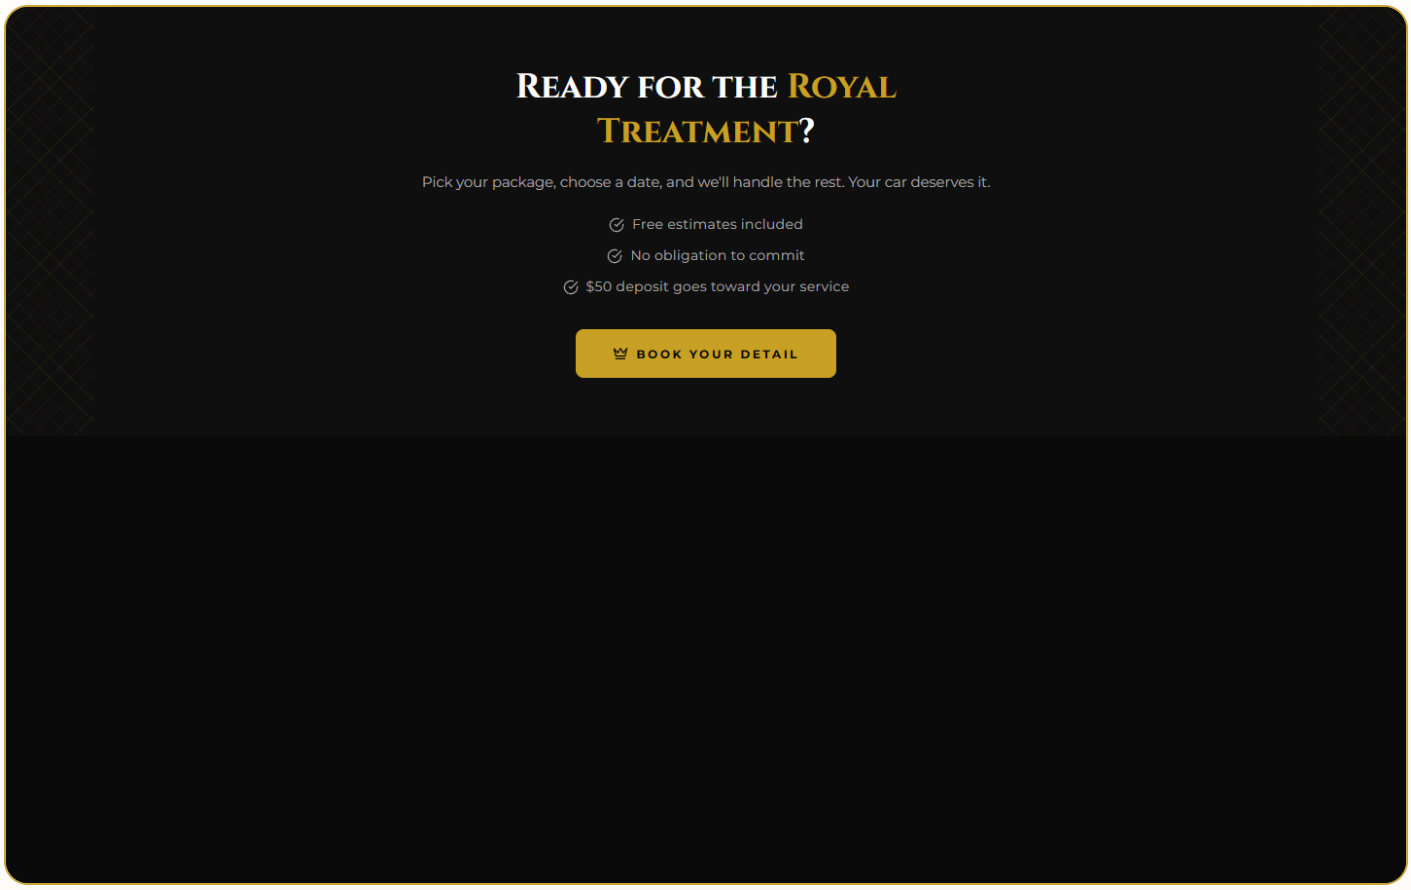
Invisible honeypot field blocks bot submissions. Real humans don't see it — spammers fill it and get rejected.

06 — NEW CLOSING PUSH

A dedicated closing call-to-action

Not everyone books the first time they land. The new closing CTA section — shown right before the footer — is one last push for visitors who scrolled all the way through and need a final nudge.

NEW SECTION ON THE UPGRADED SITE



Catches the "almost ready"

Visitors who scrolled through the whole page are the warmest leads. A second CTA converts the ones who forgot where the form was.

Reinforces the brand

"Ready for the Royal Treatment?" — ties back to the brand name one more time. Memorable.

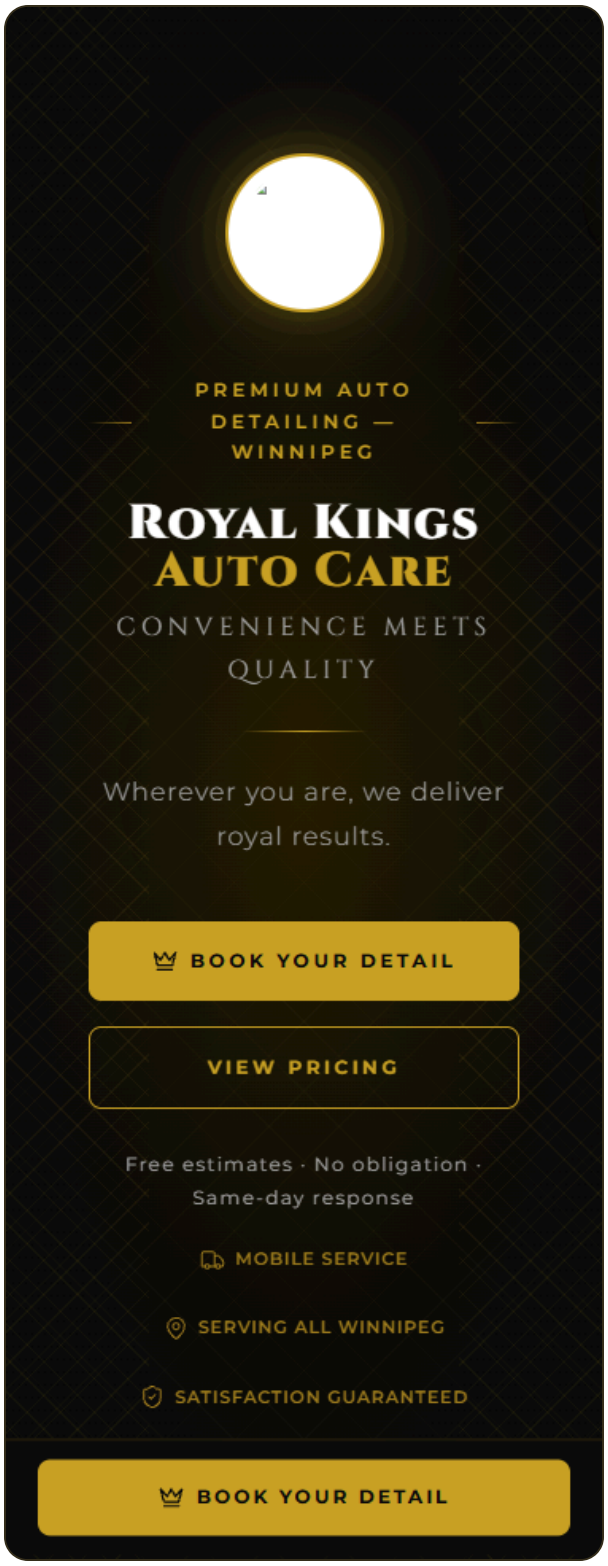
Works on any scroll speed

Fast scrollers get caught by the sticky mobile bar. Slow readers get caught by this. Every reader has a path to book.

07 — NEW MOBILE EXPERIENCE

Sticky "Book Now" bar for phone users

Most of your traffic comes from phones — Instagram taps, Google searches on mobile, TikTok bio clicks. The sticky "Book Now" bar stays pinned to the bottom of the screen the entire time they're scrolling, so booking is always one tap away.



✓

No scrolling up to find the form. Pinned to the bottom of the screen while they scroll.

✓

Matches the site palette. Professional, not aggressive. Familiar pattern users already know.

✓

Respects the notch and bottom home indicator on newer iPhones — doesn't get cut off.

✓

Desktop users don't see it — it would just take up screen real estate they don't need.

08 — UNDER THE HOOD

The invisible upgrades — the ones Google cares about

These are changes you won't see at a glance, but they're the ones that separate a hobbyist site from a professional one. They affect search ranking, load speed, and who can actually use the site.

SEO

LocalBusiness schema for Google

Tells Google you're an auto-detailing shop in Winnipeg (not just some website). Unlocks "near me" search results.

SEO

Open Graph + Twitter Cards

When someone shares your link in a text or on Instagram, it now shows a proper preview card with your logo — not a broken thumbnail.

SPEED

Deferred script loading

Content paints first, scripts load after. Page feels faster even on slow mobile connections.

SPEED

Explicit image dimensions

Page doesn't "jump" as images load. Smoother scroll, better scores on Google's Core Web Vitals.

ACCESSIBILITY

Keyboard-friendly FAQ

Tab + Enter opens accordion items. Screen readers announce the right labels. Meets WCAG AA contrast standards.

ACCESSIBILITY

Safe-area padding on sticky CTA

iPhones with notches don't cut off the "Book Now" button anymore — displays correctly on every phone model.

SECURITY

Honeypot spam protection

Invisible form field that bots fill in and humans don't. Blocks garbage submissions from ever hitting your inbox.

TRUST

Digital waiver + Drive archive

Signed waivers are saved straight to your Google Drive. Deposit policy displays on both form and waiver — no disputes.

09 — FINAL PIECES

Two things to finish it off

The upgrade is 95% ready to push live. To fully flip the switch, we just need two small batches of real content from you.

1. Photos

Before & After shots

3–6 pairs of before/after photos from past jobs. Phone shots are fine — we'll crop and colour-match them. A before/after slider section is already built and waiting.

2. Reviews

Real customer testimonials

3 real quotes + first names (and city if comfortable). Can be screenshots of texts, Google reviews, or Facebook comments — we'll format them.

Ready to flip the switch?

Once we get the photos and testimonials, the upgraded site replaces the current one in under 24 hours. No downtime, same URL, bigger impact.

Let's push it live
